Workshop THEMES 2017- Physics and biogeochemistry of
marine environments: multiscale analysis of past and
present variability

15th-17th November 2017, Venice, Italy

Program

(Full details of the contributions at the end of the program)

Wednesday 15 th November	
Location: Aula Mario Baratto, Ca'Foscari Palace, Dorsoduro 3246 - 30123 (VE)	
8:30-8:45	Registration and welcome drink/eat
8:45-9:00	Angelo Rubino, Antonio Marcomini. Opening and welcome speeches
Session 1: Chaired by Paola de Ruggiero	
Deep and abyssal oceanography and their consequences on the near-surface layers	
9:00-9:15	Manuel Bensi. Shelf and slope dynamics offshore the west Svalbard continental margin
9:15-9:30	Nadia Lo Bue. The role of the bottom turbulence generated by inertial waves in the characterisation of the deep dynamics of the Western Ionian Sea.
9:30-9:45	Andrea Bergamasco. Exploring past and modern bottom current pathways along the continental margin: the Ross Sea survey 2017
9:45-10:00	Vedrana Kovačević. A multiplatform approach to investigate new dense water pathways and their fate in the middle and southern Adriatic: the winter 2015-2016 case
10:00-10:30	<i>Coffee break for all participants</i>
10:30-11:00	Giuseppe Civitarese. Everything you Always Wanted to Know About BiOS* (*But Were Afraid to Ask) (invited)
11:00-11:15	Miroslav Gacic. The Adriatic-Ionian Bimodal Oscillating System-Coriolis Rotating Platform Experiment.
11:15-11:30	Marco Reale. Modeling approaches to BiOS dynamics.
Session 2: Chaired by Giannetta Fusco	
The Mediterranean “miniature ocean”	
11:30-11:45	Christian Ferrarin. Tidal dynamics in the inter-connected Mediterranean, Marmara, Black and Azov seas.
11:45-12:00	Natalija Dunic. Multi-model analysis of the Adriatic-Ionian thermohaline circulation using multi-decadal regional ocean simulations.
12:00-12:15	Eleonora Cusinato. Mediterranean thermohaline response to large-scale atmospheric forcing in a MedMIT12 simulation.
12:15-12:30	Antonio Ricchi. Analysis of a flash-flood event over the North-East Italy by means of a very-high resolution atmosphere-ocean-wave coupled model.
12:30-14:00	<i>Lunch*</i>
Session 3: Chaired by Emilie Dassié	
From small to mesoscale processes	

14:00-14:30	Sandro Carniel. Addressing Atmosphere-Ocean-Wave interactions with a fully coupled numerical model: lessons learnt in transition zones (invited)
14:30-14:45	Federico Falcini. The role of Internal Solitary Waves on sedimentary and mixing processes: from dune-forming to breaking mechanisms.
14:45-15:00	Gian Marco Scarpa. Morphological variations induced by ship wakes in a coastal lagoon
15:00-15:15	Kirill Bulgakov. Numerical Simulation of the Transformation of a Nonlinear Wave at a Finite Depth.
15:15-15:30	Gordana Beg Paklar. Dispersion of the passive tracer in the east Adriatic coastal waters.
15:30-16:00	<i>Coffee break for all participants</i>
16:00-16:15	Pierpaolo Falco. Experimental highlights of the eddy saturation regime in the Southern Pacific Ocean
16:15-16:30	Giannetta Fusco. Surface heat fluxes, polynya extent and thermohaline variability in Terra Nova Bay (Ross Sea - Antarctica).
16:30-16:45	Daniele Zannoni. Sea breeze regime effects on the isotopic composition of water vapor in coastal areas.
16:45-17:00	Enrico Zambianchi. Transport of marine litter in the Mediterranean.
Session 4: Chaired by Elisabeth Kubin From large-scale to global processes	
17:00-17:15	Stefano Pierini. Analysis of the non-autonomous behavior of a low-order ocean model and of its pullback attractors.
17:15-17:30	Marco Bianucci. Timing El Niño: analytical results.
17:30:17:45	Emilie Dassié. Spatio-temporal variability of the South Pacific Convergence Zone fresh pool eastern front from coral-derived surface salinity data.
17:45-18:00	Irena Ciglenečki. Long-term investigations of organic matter content in the Adriatic Sea as an indication of global changes.
18:00-18:30	<i>DISCUSSION</i>

Thursday 16th November	
Location: Aula Mario Baratto, Ca'Foscari Palace, Dorsoduro 3246 - 30123 (VE)	
Session 5: Chaired by Suzana Blesic Marine ecology	
9:00-9:15	Richard Hofmeister. Seamless multi-scale ecosystem modelling of the north-west european shelf seas.
9:15-9:30	Stanislav D. Martyanov. Model estimates of the Barents Sea ecosystem functionality and its contribution in the carbon dioxide exchange between the ocean and the atmosphere.
9:30-9:45	Andrea Augusto Sfriso. Macroalgal growth and phycobiliproteins production in the Northern Adriatic Sea.
9:45-10:00	Daniele Brigolin. Early diagenesis in sediments of the Venice lagoon.
10:00-10:15	Jorge López Parages. Exploring large-scale climate influences on North

	West African fisheries and related implications for statistical forecasting.
10:15-10:30	Elisabeth Kubin. The oceanographic buoy Vida in the Gulf of Trieste and tychopelagic diatoms on the oxygen sensor and throughout the water column
10:30-11:00	<i>Coffee break for all participants</i>
Session 6: Chaired by Debora Bellafiore <i>Monitoring and experimental oceanography</i>	
11:00-11:30	Werner Alpers. On radar signatures of upwelling regions (invited)
11:30-11:45	Filippo Bergamasco. A new technique for sea-current estimation from 3D stereo data
11:45-12:00	Davide Bonaldo. Modelling Continental Shelf Waves in the southern Adriatic Sea: cross-margin transport dynamics beyond dense water cascading.
12:00-12:15	Ivica Vilicic. Sclerochronology: tool for uncovering environmental drivers in a semi-enclosed sea.
12:15-12:30	Elena Mauri. Variability of physical and biochemical properties in the Eastern Levantine Sea in the period September 2016- March 2017.
12:30-14:00	<i>Lunch*</i>
14:00-14:15	Nastjenjka Supić. Preliminary analysis of 2017 winter cruise data in the northern Adriatic within frame of EcoRENA project
14:15-14:30	Paola de Ruggiero. Water masses in the Eastern Mediterranean: an analysis of measured isotopic oxygen.
14:30-14:45	Francesco de Rovere. What can we learn about the equatorial daily cycle from the TAO buoy data? A discussion on implications of radiative heating errors.
14:45-15:00	Volkan Özbel. Determine the Seismic Activity on the Marmara Sea with Using GPS measurements.
15:00-15:15	Carolina Cantoni. Along-path changes of dissolved inorganic carbon in the intermediate layer of the Western Mediterranean.
15:15-15:45	<i>Coffee break for all participants</i>
Session 7: Chaired by Nadia Lo Bue <i>Past, present, future</i>	
15:45-16:15	Georg Umgiesser. The future of Venice: sea level rise, storm surges and the mobile barriers (invited)
16:15-16:30	Nicola Scafetta. Interpretation of the post 2000 temperature standstill
16:30-16:45	Piero Lionello. Comparing the evolution of the Adriatic and Black Sea sea level during the 20th century: a lesson for the future?
16:45-17:00	Feifei Liu. Modelling the Mediterranean Sea interannual variability in the 20th Century.
17:00-17:15	Sara Rubinetti. Hydrological variability over the last two centuries inferred from discharge records of European rivers.
17:15-17:30	Vincenzo Artale. Trend series analysis and oscillations in the Mediterranean - North Atlantic coupled system.
17:30-17:45	Giuliano Dreossi. An extended climate archive from the Eastern Alps: the Mt Orls ice cores.
17:45:18:00	Adriano Mazzarella. The length of the day and the integrated Northern

	Atlantic oscillation indices suggest that the Little Ice Age was 1.0-1.5 °C globally cooler than modern times.
18:00:18:30	<i>DISCUSSION</i>
20:30	<i>Social dinner*</i>

Friday 17th November	
<i>Location: Aula Mario Baratto, Ca'Foscari Palace, Dorsoduro 3246 - 30123 (VE)</i>	
Session 8: Chaired by Sara Rubinetti	
	<i>Open session</i>
9:00-9:15	Davide Zanchettin. Persistent Mesoamerican Monsoon Regime Initiated by Deglaciation in the Early Holocene
9:15-9:30	Maeregu Woldeyes Arisido. Spatio-temporal quantification of climate model errors in a Bayesian framework.
9:30-9:45	Marco Marozzi. Nonparametric methods for testing statistical significance of climate anomalies.
9:45-10:00	Suzana Blesic. Changes in value and character of long-term persistence of the river flow induced by damming.
10:00-10:30	<i>Coffee break for all participants</i>
Session 9: Chaired by Katrin Schroeder	
	<i>Open Discussion</i>
10:30-12:30	Open discussion on possible future cooperation
12:30-14:00	Open end of the workshop

*at participants' cost

All talk slots, except solicited talks, include a 12-minute presentation and 3 minutes for discussion.

Supported by:

University Ca'Foscari of Venice – DAIS <http://www.dais.unive.it/>
